

THE DATASET GIVEN TO ME WAS ABOUT WELLNESS CENTRES WITH ALL OF THEIR LOCATIONS IN INDIA WITH THE COUNT OF DOCTORS AND THE SPECIALITY OF THEM EACH WITH THE EXACT LATITUDE AND LONGITUDE COORDINATES

THE PROJECT WAS TO ANALYZE THE DATA AND FIND PLACES WHERE TO OPEN THE CENTRES

1) SO FIRST USING THE GIVEN COORDINATES I PLOTTED THE LOCATIONS ON THE MAP OF INDIA ON THE FACTOR OF DOCTOR COUNT (RED – YELLOW)

2) USING A BAR GRAPH I VISUALIZED WHICH THE COUNTS OF CENTRES IN EACH CITY

This clearly shows that DELHI/NCR has a lot of centres followed by Mumbai and hyderabad.

3) TO FURTHER ANALYZE THE DATA USING A USING A TEXT TABLE I GOT THE COUNT OF DOCTORS BASED ON THEIR CATRGORY

COUNT OF THE NO OF DOCTORS

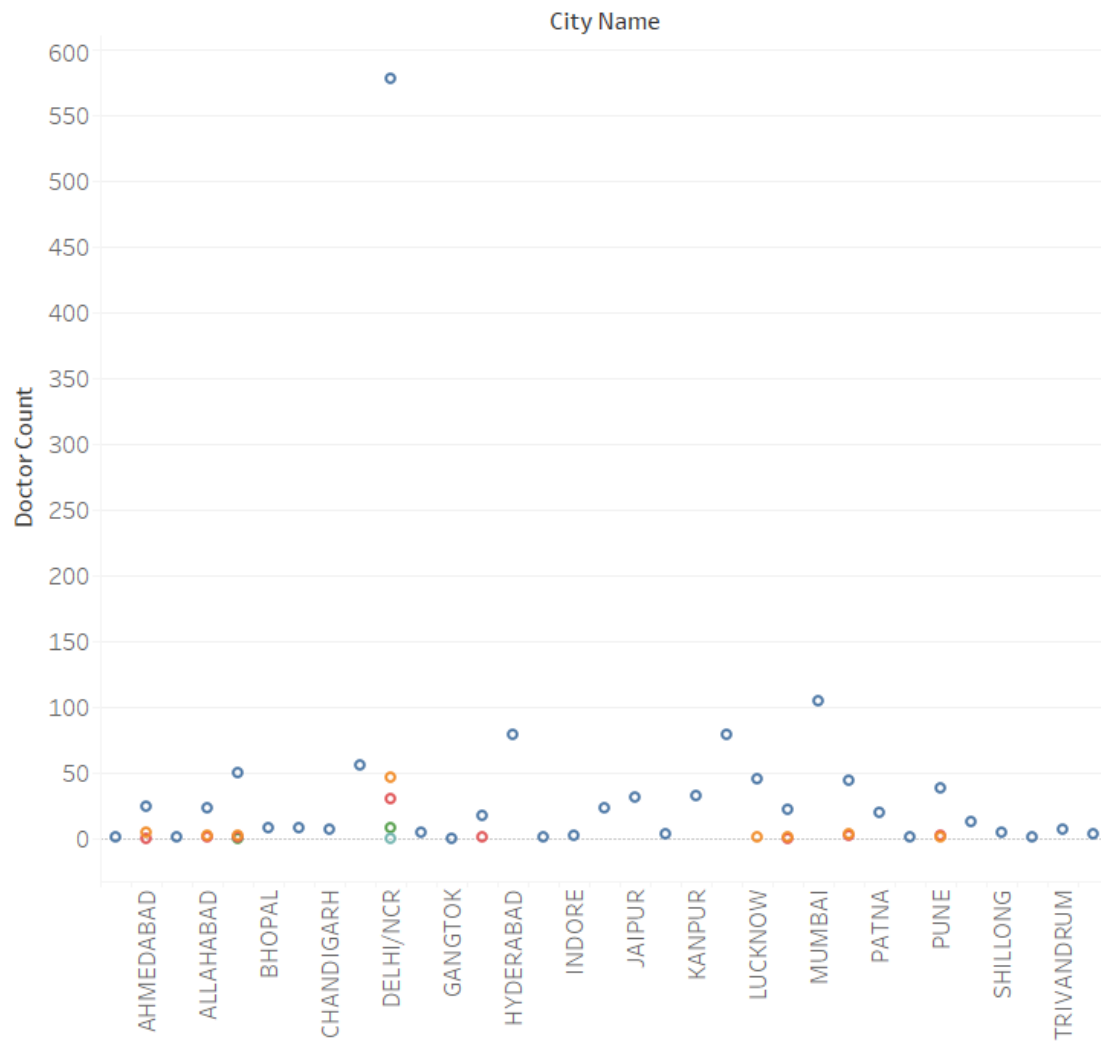

Category				
alopathic	ayurvedic	homeo	siddha	unani
1,353	68	45	1	10

This shows the number of doctors are relatively more for alopathic than of any other category. To show that the alopathic members are more in number

To show the distribution of this in a pictorial form I have used pie chart

4) Finally to show the distribution of each category of doctor in each city I have used a bar graph again but depicted it using circles

CONCLUSION:

USING THIS WE CAN CONCLUDE THAT THE NO OF DOCOTRS OF ANY CATEGORY THAN ALOPATHIC ARE LESS IN NUMBER SO THERE IS A DEMAND FOR OTHER CATEGORY DOCTORS

AND THE IDEAL PLACE TO OPEN A STORE IN DELHI IS QUITE RISKY DUE TO A LOT OF COMPETIION THOUGH HAVING DOCTORS OTHER THAN ALOPATHIC CAN HELP IDEAL PLACE COULD BE HYDERABAD OR MUMBAI AS IT IS A METRO CITY AND HAS LESS COMPETITION
